🐙 BernardoPe 🌐 BernardoPe

Computer Science and Engineering student with a focus on distributed systems and cybersecurity. Interested in building reliable, high-performance software and applying theoretical knowledge to real-world problems.

Education

Instituto Superior Técnico <i>MSc, Computer Science and Engineering</i> Current Grade: 18/20	09/2025 – 07/2027
Instituto Superior de Engenharia de Lisboa <i>Bsc, Computer Science and Engineering</i> Grade: 17/20	09/2022 – 07/2025

Professional Experience

Sky <i>Apprentice Developer – xTV Devices & Tech</i> - Built a DeepLink Testing Tool using Lightning.js over two months, streamlining workflows across Sky teams. - Enabled multi-device testing of deeplinks for platforms including Peacock, SkyShowtime, NOW, and Showmax. - Gained practical front-end experience, adhering to agile methodologies and version control best practices.	07/2025 – 08/2025
---	-------------------

Projects

HtmlFlow 🔗 <i>Java/Kotlin DSL for type-safe HTML</i> - Active contributor and maintainer of HtmlFlow, a type-safe HTML DSL for Java and Kotlin. - Implemented integration with the http4k 🔗 framework and hot-reload support for views. - Currently working on integration with the Datastar 🔗 framework	06/2025 – Present
Non-Blocking Progressive Server-Side Rendering Benchmark 🔗 <i>Final Project – BSc in Computer Science and Engineering (20/20)</i> - Benchmarked progressive server-side rendering in the JVM using Spring MVC, WebFlux, and Quarkus across reactive, coroutine, and virtual-thread execution models. - Compared traditionally blocking template engines against non-blocking rendering approaches, both with and without Java virtual threads. - Demonstrated that virtual threads enable scalable non-blocking rendering with blocking engines while preserving simple synchronous APIs.	01/2025 – 07/2025
Instant Messaging 🔗 <i>Full-stack Messaging Application</i> - Built an Android client in Kotlin as well as a Web client with React + Typescript for a real-time channel-based messaging platform. - Implemented backend services using Spring MVC and JPA.	10/2024 – 01/2025

Skills

Languages Kotlin, Java, Typescript, Javascript, Python, C.	Backend Spring MVC & WebFlux, RxJava, Quarkus, Express.js, Nginx.
Frontend HTML, CSS, React, Lightning.js Material-UI, Jetpack Compose, Android.	Databases & Cloud PostgreSQL, MongoDB, ElasticSearch, Firestore, Google Cloud.

Awards

Merit Scholarship Next Level@IPL - 2022/2023 & 2024/2025

Languages

Portuguese • English — C1
